This Activeaid raised toilet seat is unique in its design to accommodate perineal access from either of 4 directions. The cut-out portion of the seat can be placed over the toilet in the desired direction and the legs can be adjusted in height while maintaining a stable platform form for seating. The large seating surface is padded with a high-density foam that provides excellent support while the cut-out may offer some additional pressure relief. Because it is lightweight it is easy to move out of the way and no tools are required. The height of the seat can be easily adjusted from 18 1/2" to 21 1/2" tall. Easy to use, versatile, sturdy, and comfortable are features that combine to make this padded seat a unique bathroom aid.
