1124 and 1105

Evolution Series Rehab Shower/Commode Chair Models 1124 and 1105

Models 1124 and 1105 are the next additions to our Evolution Series Chairs.

The modular components and frame adjustments (**seat height and seat slope on 1124 and seat height on 1105**) along with a 4-way directional slotted seat, will help to alleviate the need for custom design and its consequent added costs and delivery times.

These models will be an ideal chair for facility use as they can be used as a fitting chair in preparation for a client's discharge. The design also addresses the evolving needs of the rehab client once they return to a home environment.

Model 1124
