

Series  
805 and 824

## #800 Evolution Series Adjustable Height, Mobile Shower Commode

These Activeaid chairs have all the versatility of our other Rehab Shower/Commode Chairs but have the added benefit of an adjustable seat height. The seat height from floor is adjustable in 1" increments from 20 ½" to 23 ½". This feature addresses the situations where multiple under-seat clearances are required or seat height adjustment is desired for user comfort, safety, or convenience.

The modular design with a 350-pound seating capacity provides the opportunity to create a chair that conforms to intended uses, be it for a single user or in a multiple user facility. Frame construction of Stainless Steel, with aluminum and composite components, assures durable and extensive non-corrosive performance.

Model 805

Model 824
