MATRIX

A. Overall Frame Width

Overall frame width is measured from the leftmost point of the frame to the rightmost point of the frame.

B. Overall Frame Depth

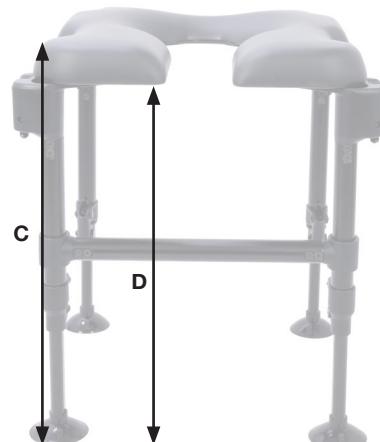

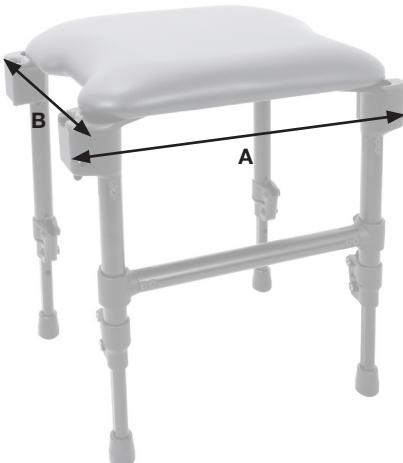

Overall frame depth is measured from the most rearward point of the frame to the most forward point of the frame.

C. Seat to Floor Height

Seat to floor height is measured from the floor to the top front edge of the standard 2" seat cushion.

D. Under Seat Clearance

Under Seat Clearance refers to the vertical distance from the lowest point beneath the seat cushion to the floor. This measurement represents the space available from the bottom of the commode seat frame to the floor, ensuring sufficient clearance to accommodate a toilet.
